

Award-winning Barracuda Spam Firewall

Product Reviews:

"The (Barracuda) Spam Firewall 300 will appeal to many SMEs, as its low price is in stark contrast to a number of other solutions reviewed ... Along with a fine set of features, its ease of installation and configuration are also bonuses and we see no reason why most users shouldn't have this appliance up and running in a matter of minutes." Rated 5 out of 6 stars – Dave Mitchell, PC Pro UK (September 2004)

*"The (Barracuda Spam) Firewall 300 was one of the easiest products I tested to set up and administer.... The product is simple to administer and is inexpensive compared to the competition." Rated 4.75 out of 5 stars
– Andre Kvitka, Federal Computer Week (July 5, 2004)*

*"The technology behind Spam Firewall is nothing new or earthshaking, but it works, it's inexpensive, and Barracuda has added significant value by combining a number of components into a seamless whole."
– Ron Anderson, Network Computing (May 13, 2004)*

*"Meet Barracuda Networks' inexpensive, easy to set up, effective and very manageable antispam and antivirus firewall appliance."
– Editorial Staff, Network Computing (May 13, 2004)*

"I've reviewed many security products, but it's rare for me to be so impressed with a product that I want to keep and use it after the review. Barracuda Networks' Spam Firewall is my favorite keeper so far this year." – Roger Grimes, InfoWorld (May 14, 2004)

"We have found that the Barracuda Spam Firewall system works extremely well, such that we will regret sending it back. We may well get very difficult about it." – Mark Gibbs, NetworkWorldFusion (May 3, 2004)
